Job Title: Individual C4ISR Trainer (CSS)

Requisition Number:

Location: Schofield Barracks, Hawaii

Clearance Level: Secret

Education: Bachelor's degree from an accredited college or university in education, training or related field of study which provides substantial knowledge in the area of expertise or high school graduate plus four years specialized experience. Completion Combat Service Support Computer System (CSSCS) or Battle Command Sustainment Support System (BCS3) operator's course required.

Currently have a position open for a C4ISR Combat Service Support Trainer working within a Battle Command Training Center (BCTC) in Hawaii.

Duties: Responsible for the effective delivery of operator, individual and staff level training for the Combat Service Support Computer System (CSSCS) or Battle Command Sustainment Support System (BCS3) to support combat operations. Responsible to provide support of the integration of other Army Battle Command Systems (ABCS): Advanced Field Artillery Tactical Data System (AFATDS), All Source Analysis System (ASAS), Maneuver Control System (MCS), Army Missile Defense Warning System (AMDWS), Force XXI Battle Command Brigade and Below (FBCB2), and FBCB2- Blue Force Tracker (FBCB2-BFT). Responsible for the developing, reviewing, and updating computer based training products, Programs of Instruction (POI), and Training Support Packages (TSP) for operator, integrator, and leader level instruction of the Army Battle Command Systems.

Desired Expertise: Operational experience employing Combat Service Support Computer System (CSSCS) or Battle Command Sustainment Support System (BCS3) in an ABCS equipped Tactical Operations Center (TOC) is extremely important. Be proficient in the use and operation of Windows NT operating system and PC hardware. Proficiency and knowledge for the employment of the Combat Service Support Computer System (CSSCS) or Battle Command Sustainment Support System (BCS3) is required. Familiarity in one or more of the following ABCS is a strong plus; Advanced Field Artillery Tactical Data System (AFATDS), All Source Analysis System (ASAS), Army Missile Defense Warning System (AMDWS), and Force XXI Battle Command Brigade and Below. Expert knowledge of the principles, methods, and techniques used in the development, and delivery of training programs. Expert knowledge of relevant software and computer equipment as required. Demonstrated effective presentation and communication skills. Ability to evaluate effectiveness of training programs and to serve as technical team or task lead.

Additional Skills: Possess the knowledge to operate the JANUS/JCATS workstation. Operators must have a solid working knowledge of basic computer operating concepts and skills, including the use of the Microsoft Office suite of applications (or similar applications), and the basic understanding of networks.
